Call Out	Description	Quantity	Service Part (Y/N)	Part Number
1	Mounting Bracket	2	Y	68260728AA
2	Bracket Screw	6	Y	
3	Pivot Section Assembly	2	N	
4	Bumper Upright Outer	2	N	
5	Bumper Upright Inner	2	N	
6	Bumper	4	N	
7	Strap Buckle Assembly	2	N	
8	Center Tube (without RAM logo)	2	N	
9	Center Tube (with RAM logo)	1	N	
10	PT Screw	12	N	
11	Blind Rivet	4	N	
12	Drill Templates	2	N	

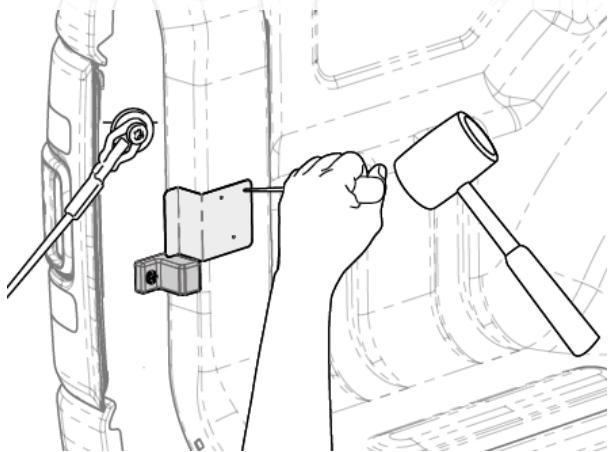

Following instructions on the supplied drill templates, align templates as shown, with top edge parallel to truck bed rail, affixing with tape.

1

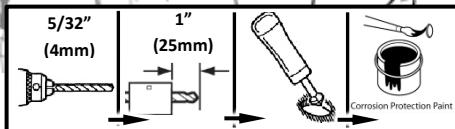

Use center punch to firmly mark drill locations as indicated on templates.

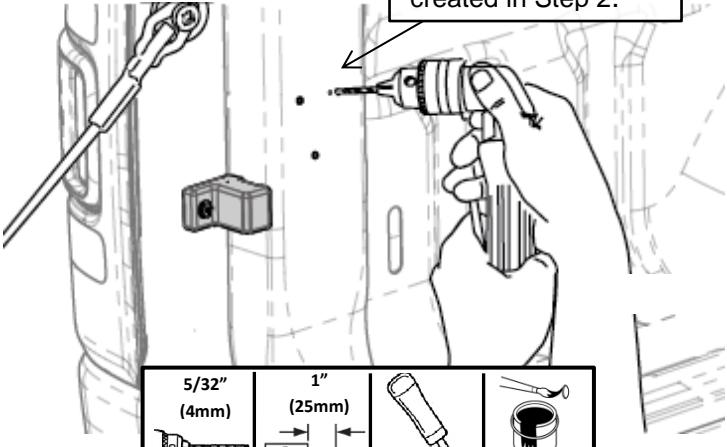

2

Drill at 3 indentations created in Step 2.

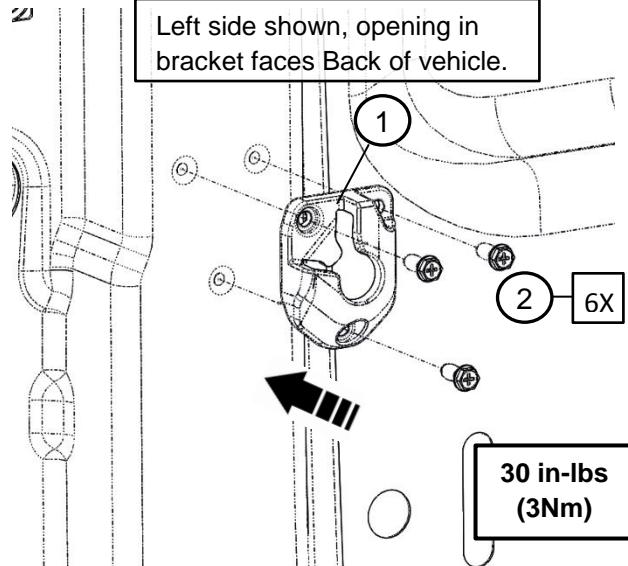

3

Left side shown, opening in bracket faces Back of vehicle.

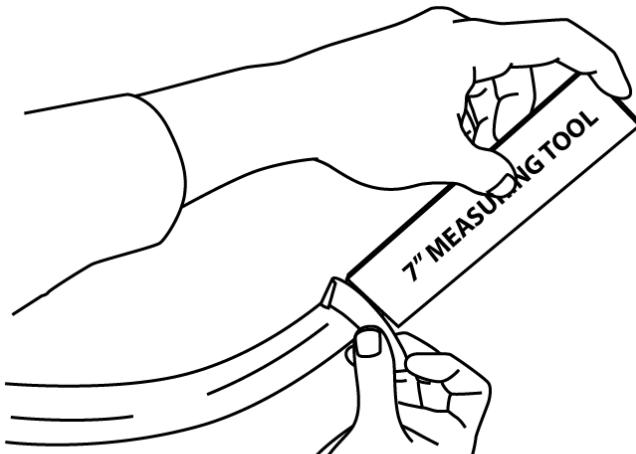

30 in-lbs
(3Nm)

4

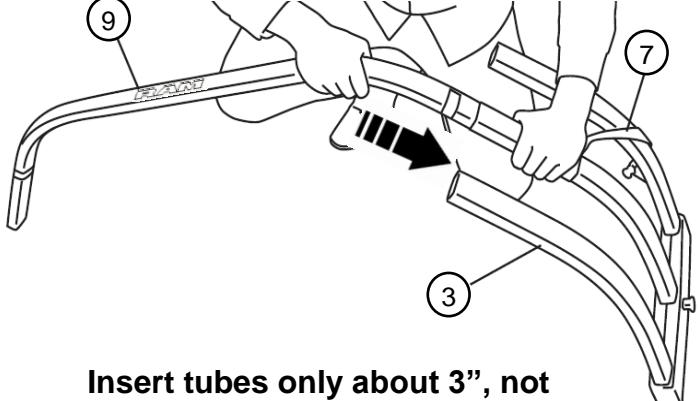

5

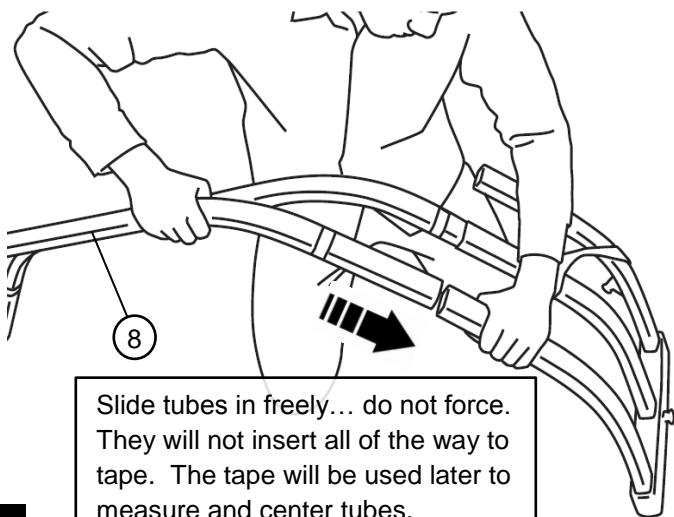

Use template (part of cardboard packaging) to measure 7" from each end of the three long tubes and mark with tape.
Tape is to be used as reference point.

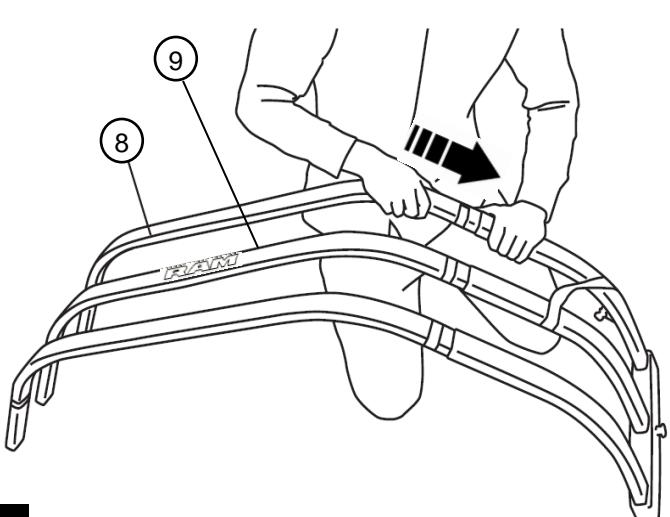

6

Insert tubes only about 3", not all the way to tape line. The final depth will be adjusted later.

Légende	La description	Quantité	Pièce de service (O/N)	Numéro de pièce
1	Support de fixation	2	O	68260728AA
2	Vis de fixation	6	O	
3	Système de pivot	2	N	
4	Montant pare-choc externe	2	N	
5	Montant pare-choc interne	2	N	
6	Pare-choc	4	N	
7	Système de boucle de sangle	2	N	
8	Tube central (sans logo RAM)	2	N	
9	Tube central (avec logo RAM)	1	N	
10	Vis PT	12	N	
11	Rivet aveugle	4	N	
12	Modèle de forage	2	N	

En suivant les instructions sur les gabarits de perçage fournis, aligner les gabarits comme indiqué, avec le bord supérieur parallèle au rail du chariot, en les fixant avec du ruban adhésif.

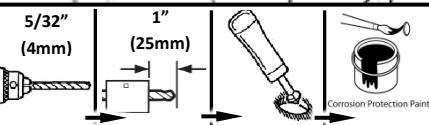

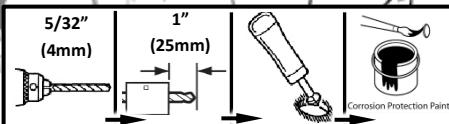

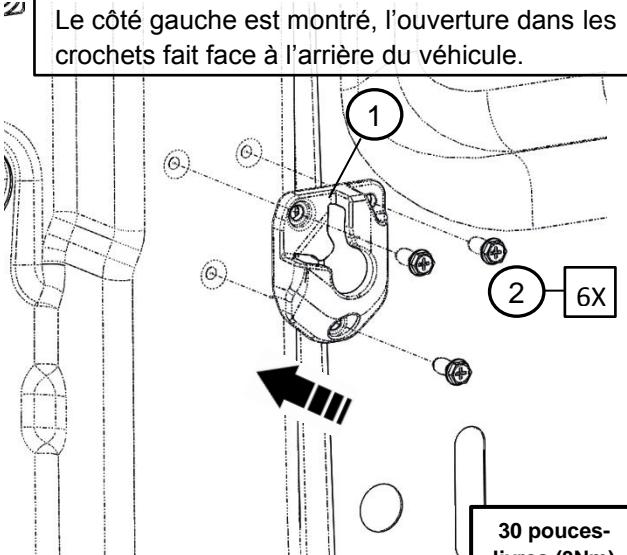

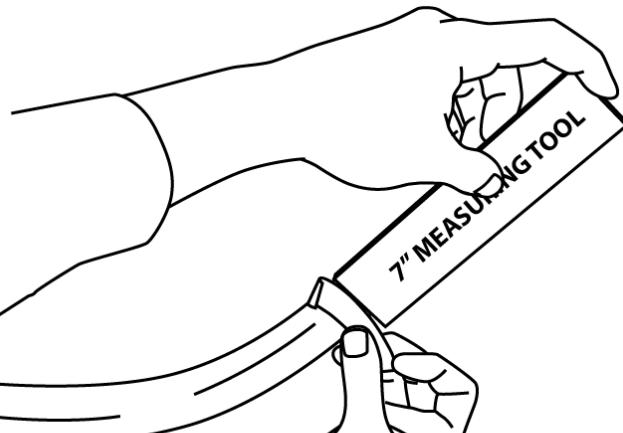

REMARQUE: Voir la dernière page pour la traduction du modèle de forage.

1

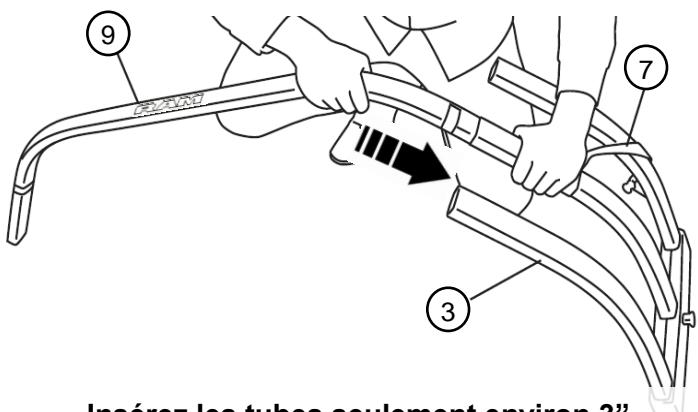

Utilisez le poinçon central pour marquer fermement les emplacements de forage comme indiqué sur les modèles.

2**3**

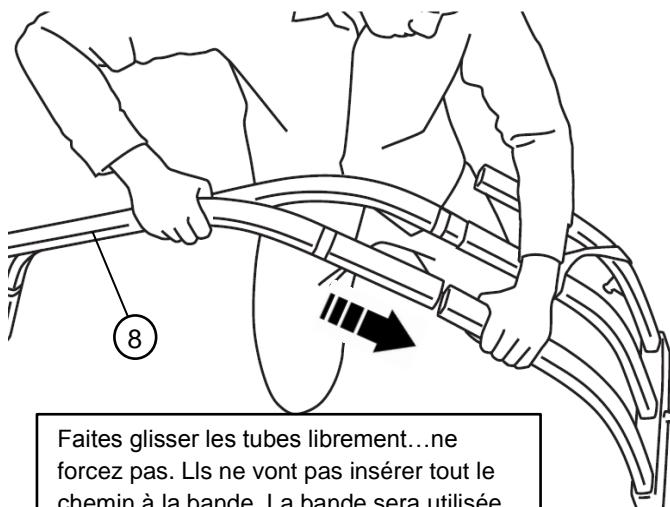

Percer à 3 indentations créées à l'étape 2.

**4****5**

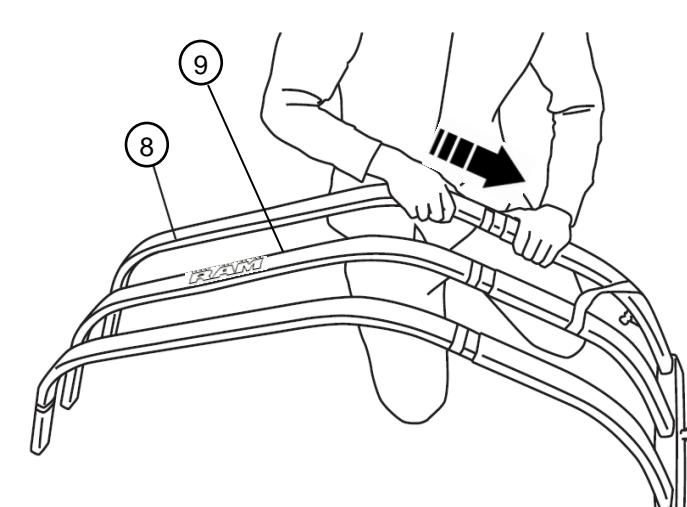

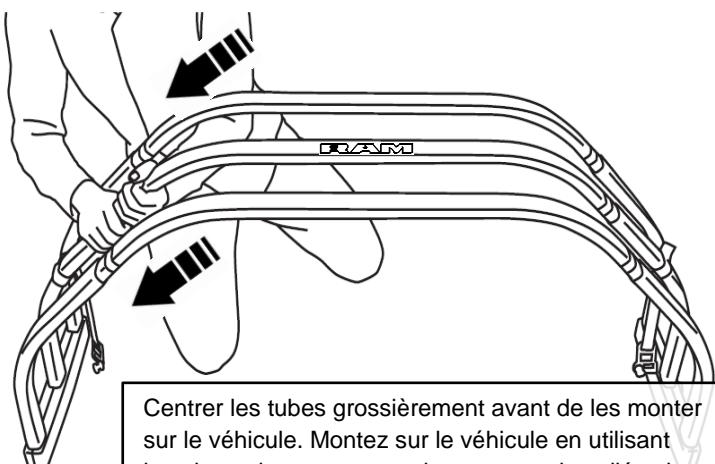

Utiliser un gabarit (une partie de l'emballage en carton) pour mesurer 7 po de chaque extrémité des trois longs tubes et marquer avec du ruban adhésif. Le ruban doit être utilisé comme point de référence.

6

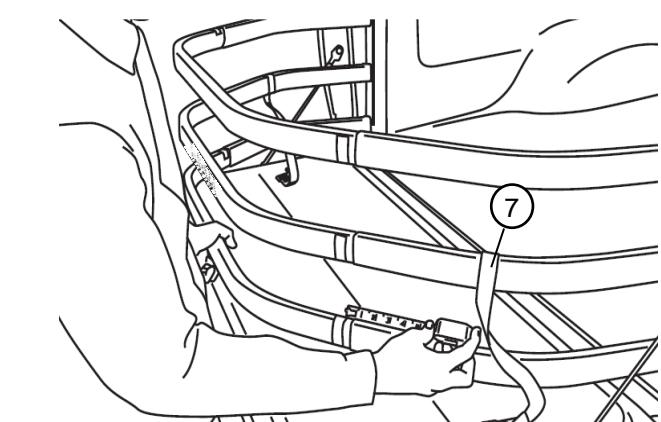

Insérez les tubes seulement environ 3", pas tout le chemin à la ligne de ruban. La profondeur finale sera ajustée plus tard.

**7**

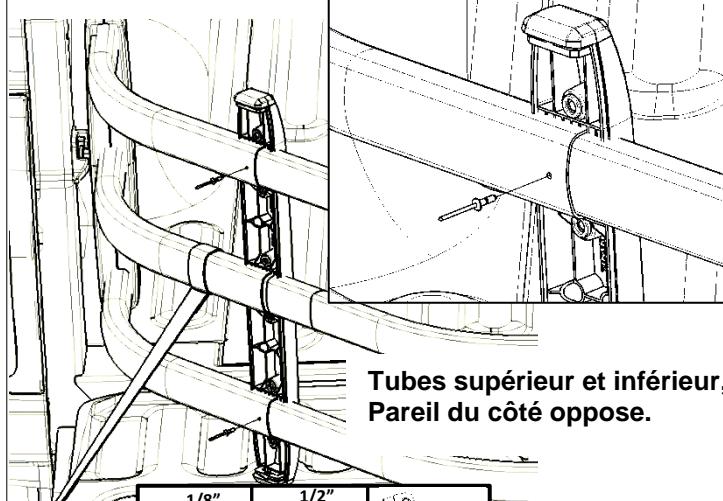

Faites glisser les tubes librement...ne forcez pas. Ils ne vont pas insérer tout le chemin à la bande. La bande sera utilisée plus tard pour mesurer et center les tubes.

**8****9**

Centrer les tubes grossièrement avant de les monter sur le véhicule. Montez sur le véhicule en utilisant les pivots de montage sur les supports installés plus tôt en insérant les pivots dans les supports tout en maintenant l'ensemble incliné vers le haut d'environ 45° et en tombant dans les supports.

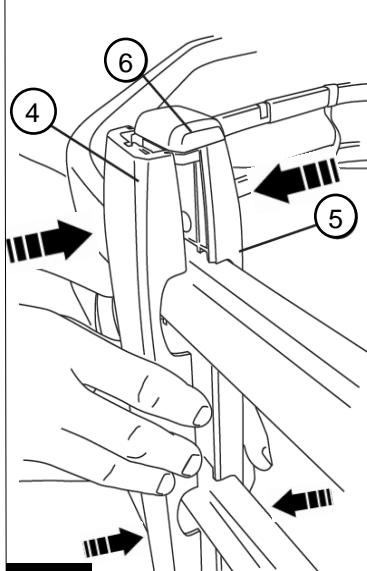

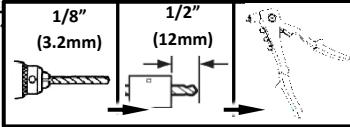

**10**

Montez l'extension de lit et ajustez chaque tube de manière à ce que l'espace entre le bord et la bande soit le même (environ 3-3.5").

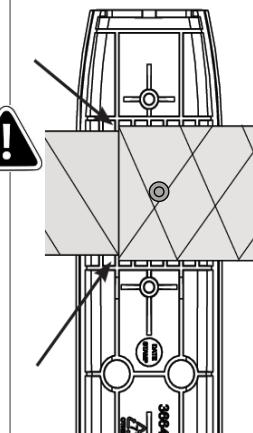

**11**

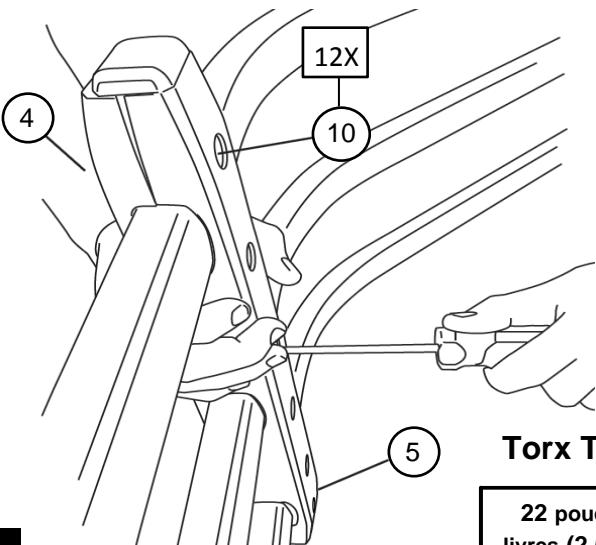

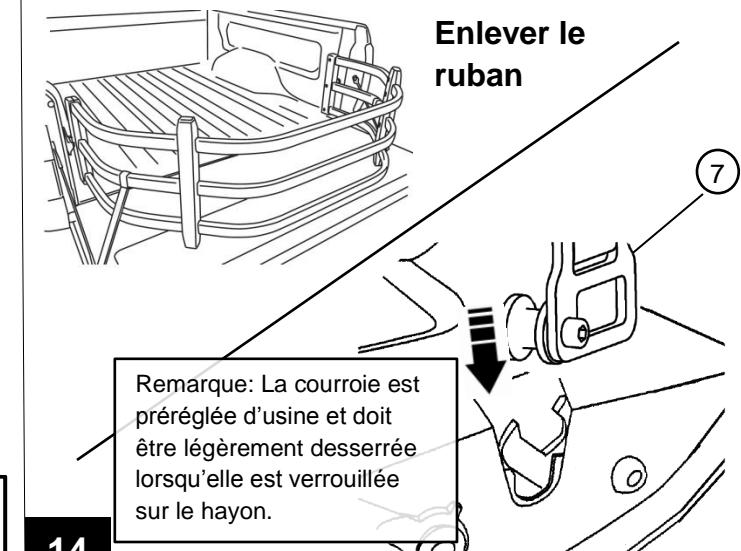

Tubes supérieur et inférieur,
Pareil du côté opposé.

Rivetage 1/8"

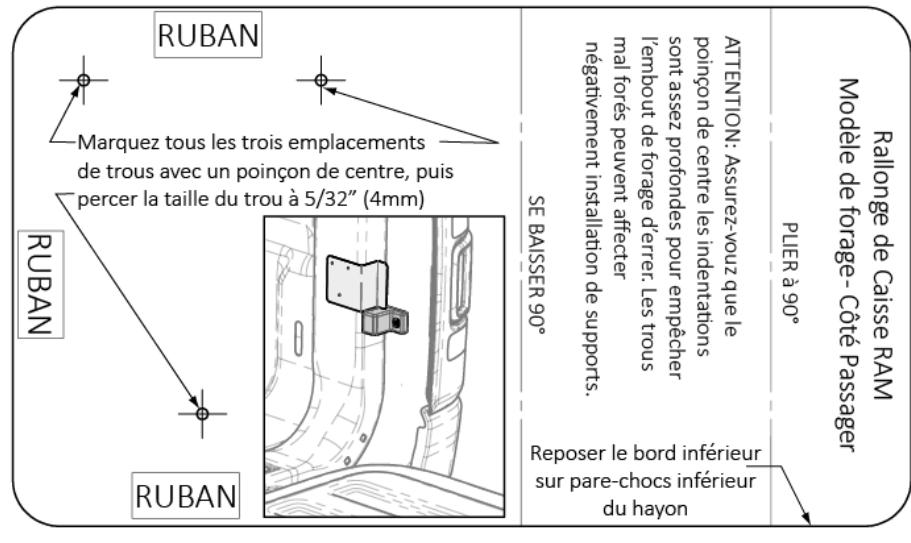

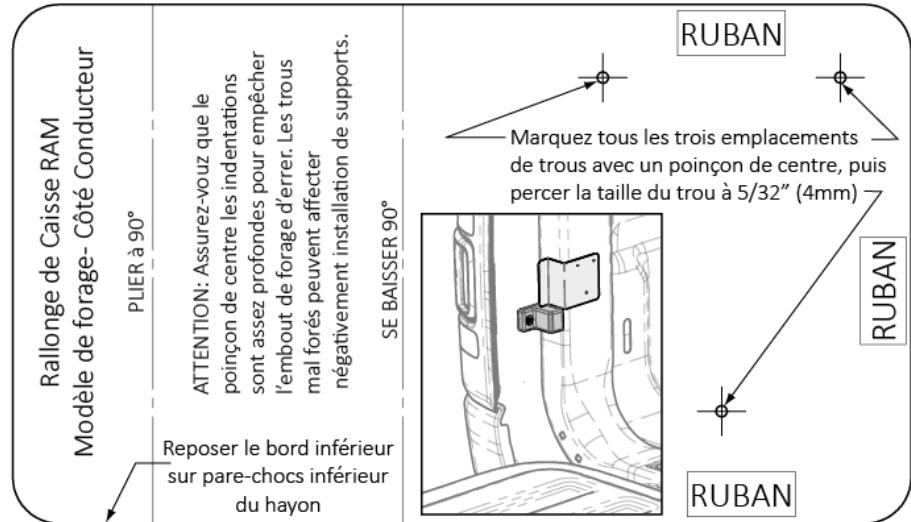

**12**

Le montant n'est pas positionné
au centre du joint de tube.

**13****14**

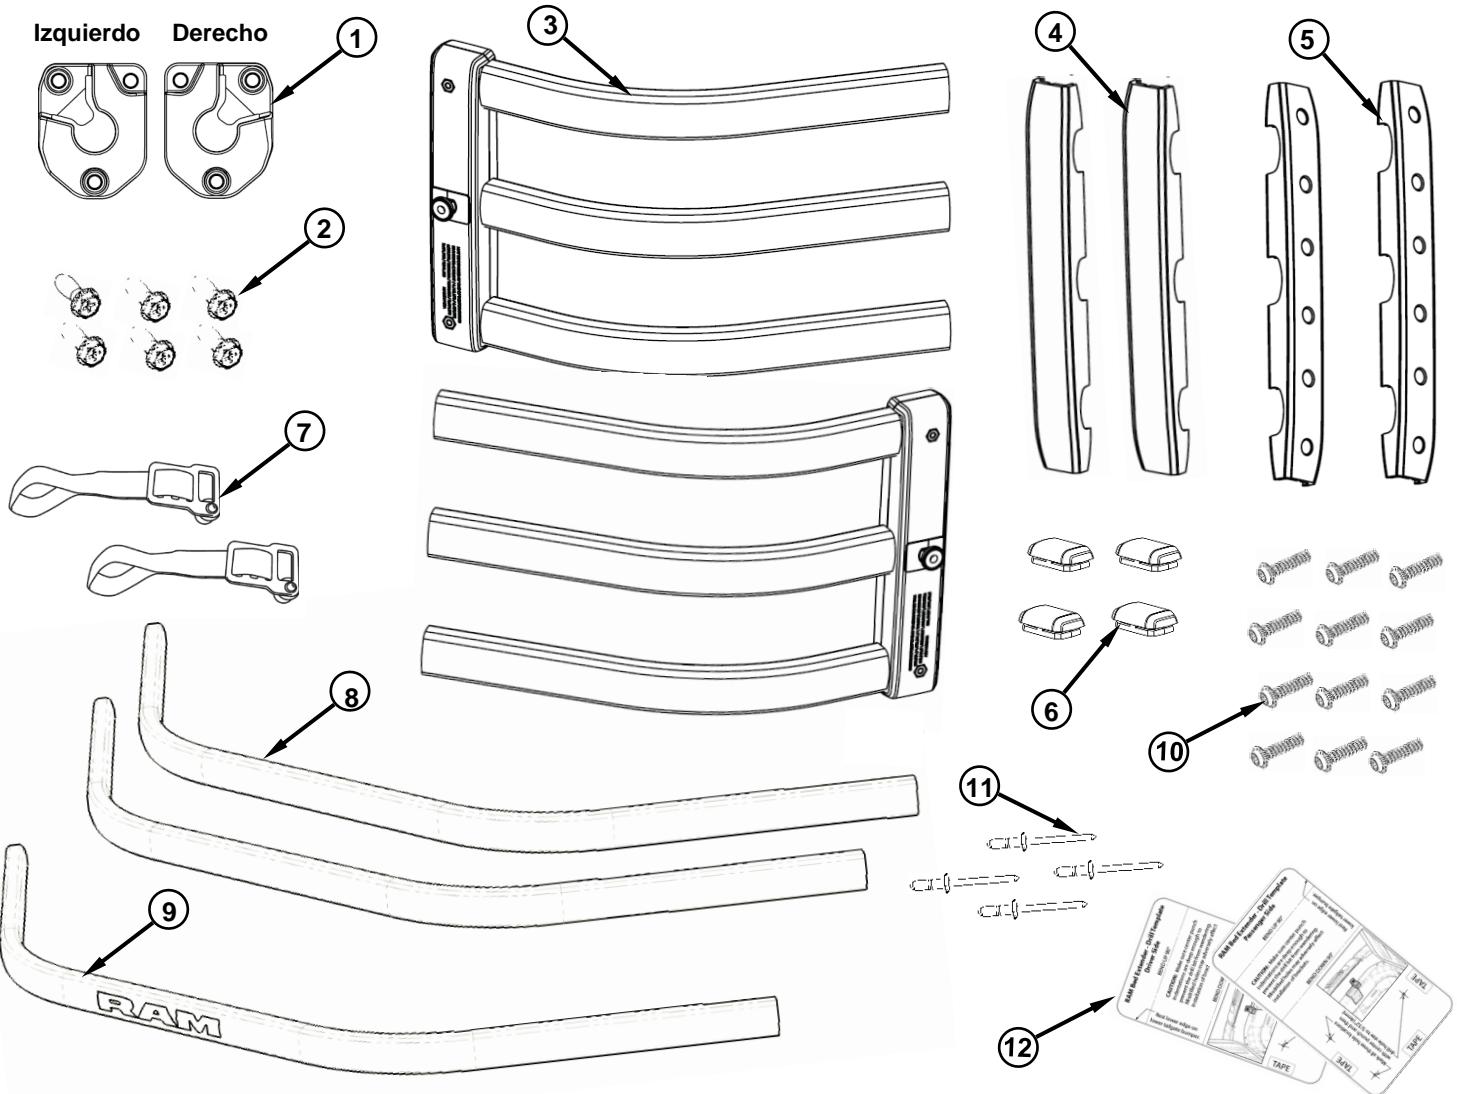

Utiliser le modèle de forage inclus dans le kit; ceci n'est qu'un exemple à des fins de traduction uniquement.

Extensor de la Caja de Carga RAM

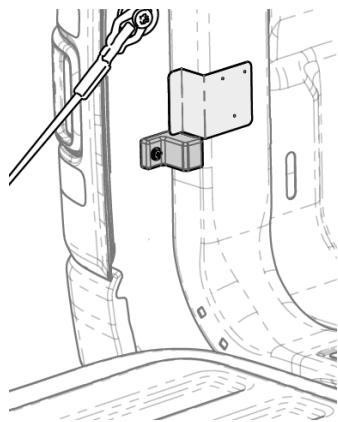

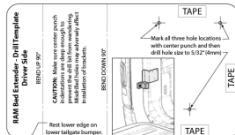

www.mopar.com

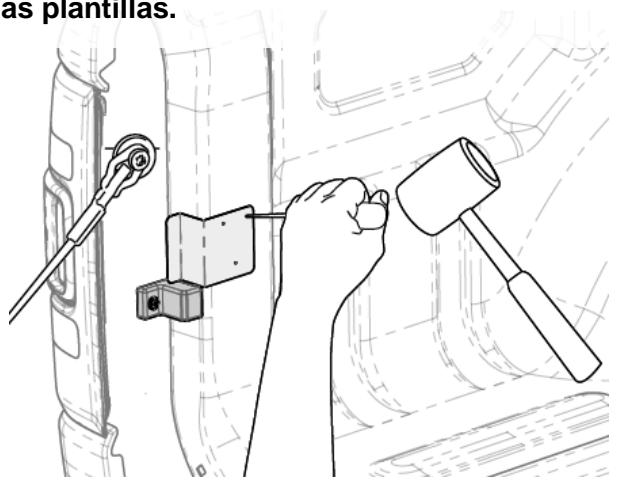

Parte	Descripción	Cantidad	Pieza de repuesto (S/N)	Número de parte
1	Soporte de montaje	2	S	68260728AA
2	Tornillo de soporte	6	S	
3	Montaje de sección de pivote	2	N	
4	Cubierta exterior de la defensa vertical	2	N	
5	Cubierta interior de la defensa vertical	2	N	
6	Defensa	4	N	
7	Montaje de correa de abroche	2	N	
8	Tubo central (sin el logo RAM)	2	N	
9	Tubo central (con el logo RAM)	1	N	
10	Tornillo PT	12	N	
11	Remache ciego	4	N	
12	Plantillas de perforación	2	N	

Siguiendo las instrucciones en las plantillas de perforación, alinee las plantillas como se muestra, con el borde superior paralelo al riel de la plataforma del camion, pegando con cinta adhesiva.

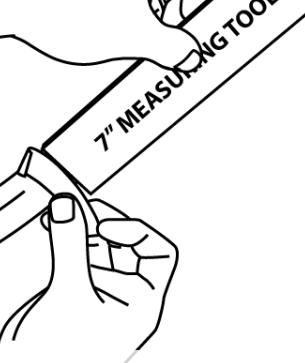

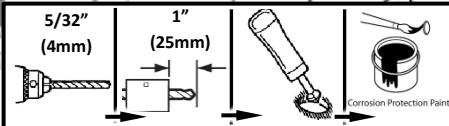

NOTA: Vea la última página para la traducción de la plantilla de perforación.

1

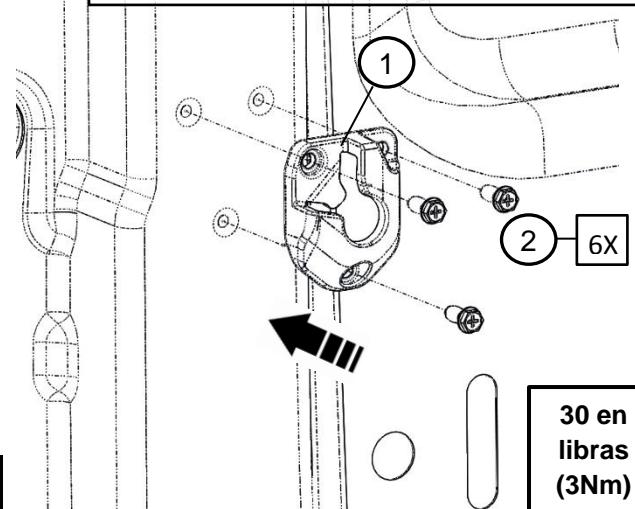

Use el punzón central para marcar firmemente las ubicaciones de perforación como se indica en las plantillas.

2**3**

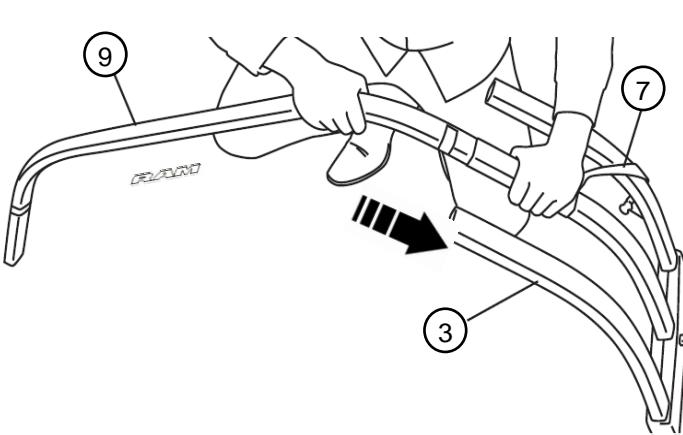

Taladre en 3 indentaciones creadas en el Paso 2.

**4**

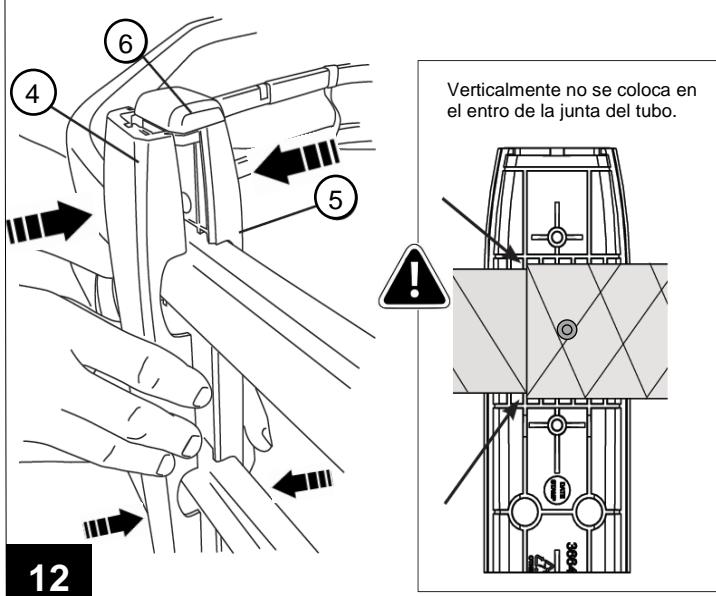

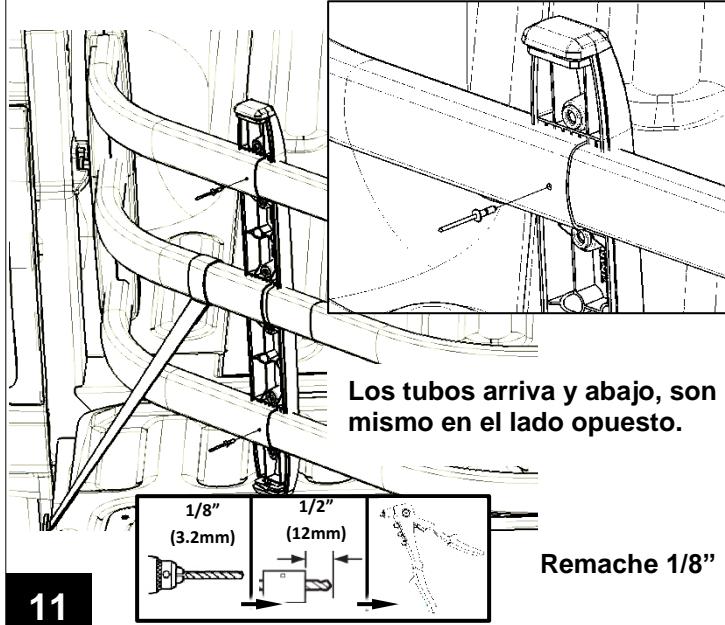

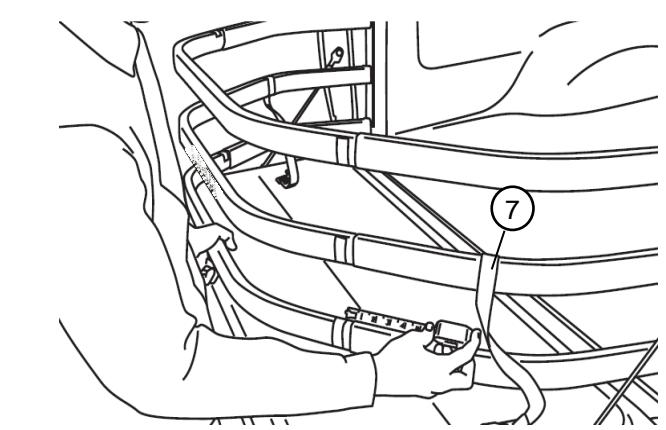

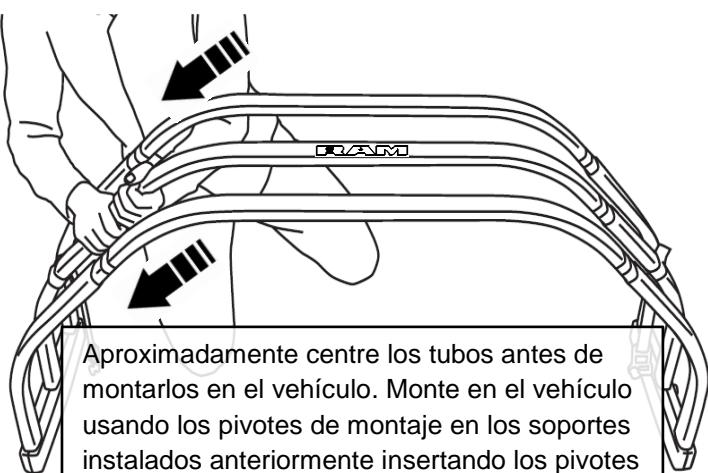

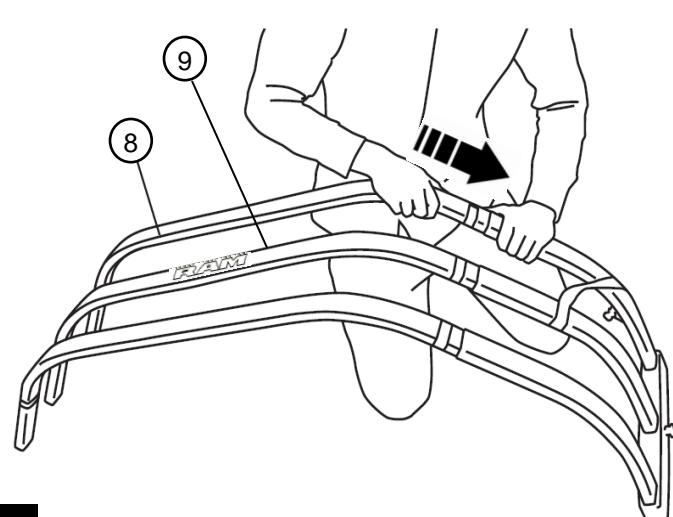

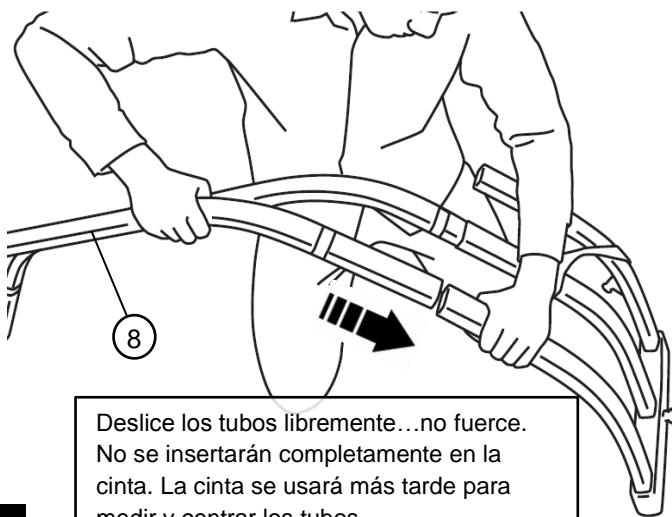

Se muestra el lado izquierdo, abriendo en las caras del soporte Atrás del vehículo.

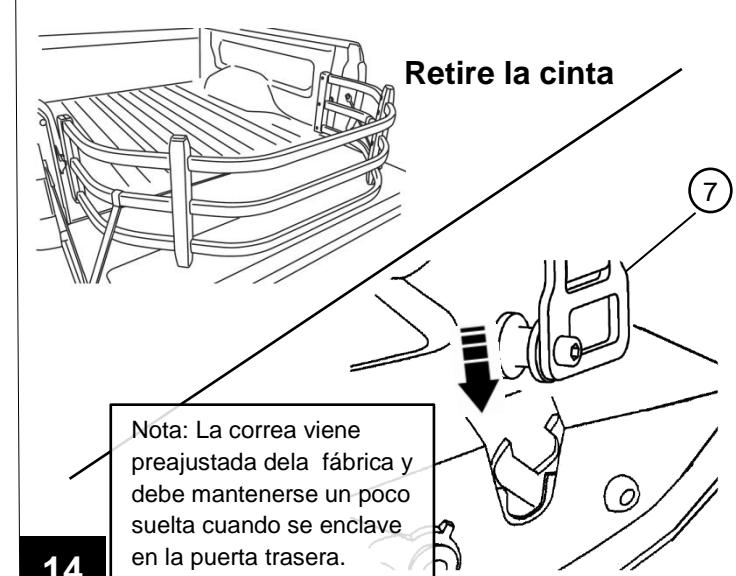

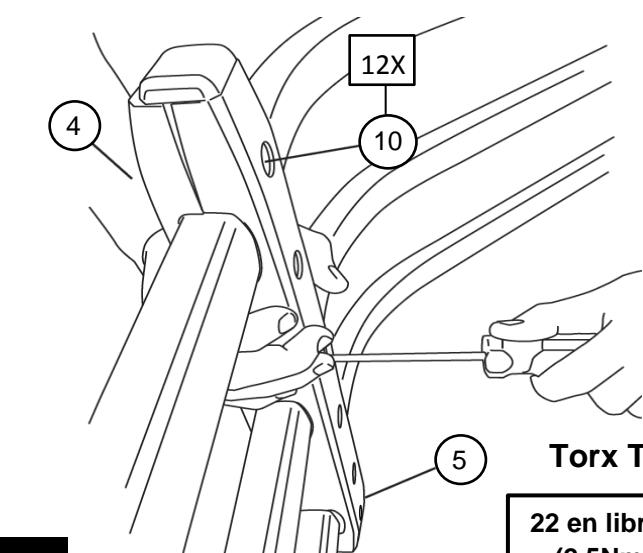

**5**

Use la plantilla (parte del empaque de carton) para medir 7" desde cada extremo de los tres tubos largos y marque con cinta adhesiva. La cinta debe ser utilizado como punto de referencia.

6

Inserte los tubos solo alrededor de 3", no completamente en la linea de cinta. La profundidad final se ajustará más tarde.

Utilice la plantilla de perforación incluida en el kit; este es solo un ejemplo para fines de traducción
